22032012

BOF of PDH gave the signal to go short. Second signal was the BOF of swing high..
Both the BOF of A and B were CT.. Short at location A and skip the trade at B.

The difference is **LOCATION**

Didnt quite understand why to skip BOF at B. Is it because of the swing high just before B? In that case even A was not shortable because of a swing low just before A. Can you please explain?

AKS

I dont remember where I have shorted.I think i have shorted at A on break of MSP. For trade B MSP did not crack.
The method has evolved over time and many tactics have changed and fine tuned. Better to go through the recent trades

ST
