There is a substantial risk of loss associated with trading Derivatives . Losses can and will occur. My methods will not ensure profits

04092013

Nifty opened above PDL and attempted to break below it. First trade was a long on BOF of PDL above the pin bar. Covered when it fell back below BRN. Another long trade on BPB of BRN and IRH. TP at 5450. Shorted below the range low as FTC above HOD. TP at IRH. Skipped the BOF long of BRN, as I was expecting another leg down. I wonder what caused a sudden fall from the range low to BRN. Did not find any other reliable trade signal later

Good ones. I did the same on 15 min.

Thanks,

Sir

Which type of order do you use for entry and exit. limit, market or stop.

thanks

Sentu

BOF of HOD came very late
Usually after 3o clock there won't be any commitment from day traders

The stalker

My entries are almost always limit orders. Immediately on entry I put a stop order. But most of the time I exit with Market orders

Hi,

what made you expect an other leg down?

last day diff b/w LTP and ATP Played out well in first min!!!

Sir

Don't you think that your system will become less effective as more and more people learn it from your blog and start following it?

Thanks

Babu

Most of the time after such momentum moves there will be a second leg retest of the low. V reversals rarely occur

SANDAMAR

No Way, In fact it will make the method more effective. If another 10000 people enter along with me means massive order flow in my favor. This alone will be sufficient to take my position to profit.
