26032013

Nifty opened below PDL. I was looking to short. First two candles acted as IR. Did not short as price did not break the MC. Did not attempt a long as it was a chop area previous day and PDL & MSP was very close. Took two trades BOF of range high and BOF of PDL/TST of Range Low. These trades did not move as expected.

I am able to understand the concept of all the decision points except MSP. I have already read the article on MSP. But unable to identify it.

Adhi

I have explained it in 28032013 post
